

# ARGONNE NATIONAL LABORATORY

## INTRA-LABORATORY MEMO

---

DATE: June 28, 2004

TO: Attendees

FROM: John Maclean

SUBJECT: BCDA Group Meeting – 06/28/04

ATTENDEES: John Maclean, Kurt Goetze, Carlotta Lukowski, Ben-Chin Cha, Peter Fuesz, Tim Mooney, Ron Sluiter

ABSENT: Joe Sullivan (vacation), Brian Tieman

### STATUS:

John:

- Interview with Randolph Butzbach went well. We are waiting to hear back from Randolph.

Tim:

- Working on assessing LDRD proposals. Nothing else to report.

Kurt:

- Working on optimization of a motor driver for Ulrik on 1-ID. Testing is incomplete.
- Evaluating viability of providing EPICS support for a photon counting device with Daniel Haskell in Sector 4. This work would take approximately 2 weeks.
- Completed work on a layout for a new transition board. Lowest possible cost is \$100-150. Will build one soon.

Carlotta:

- Has been working on some web pages for the Equipment Pool in the EOS group.
- Funkychicken is still down. ISS is working on it.
- Next BCDA meeting is 7/9/04 at 10:00 am in B3100B.

- Asked for feedback regarding the use of the new on-line meeting scheduling feature. Effective use of this feature would require each calendar owner to record accurate data regarding availability. Will send out additional information regarding this meeting planning feature to group.

Ben-chin:

- Worked on 1D overlay and calibration features for scansee.
- Modified Scansee to support colors.
- Started work on the HDF version 5 browser.

Peter:

- Lab will move 7/17-18.
- Kurt and Peter have created a tentative lab layout.
- Attended meetings to discuss lab setup.
- Has been working on transition boards. Needs to determine how much money is left on Advanced Circuit open P.O. Some parts have been ordered. Is taking an inventory of existing parts.
- Eric Boucher's returned computer equipment was inspected. The power supply of the PC became disconnected. A damage claim will need to be made to Federal Express.
- Module boards have been requested.
- Created a database for purchases.

Ron:

- Is working with Diamond and Oregon Microsystems on design problems for boards. Was able to recreate problem. The board isn't bad.
- Has been working with board vendors to get these problems corrected.
