

APS/Users Monthly Operations Meeting

Dennis Mills

APS/Users Monthly Ops Meeting

December 14, 2005

Argonne National Laboratory is managed by The University of Chicago for the U.S. Department of Energy

Agenda

- APS Update (Dennis Mills)
- Results of the 2005 User Survey (Dennis Mills)
- December/January Shutdown Activities (John Noonan)
- Detector Workshop Summary (Patricia Fernandez)
- "Insights into Permanent Magnets" (Daniel Haskel)

High Current Run

- We are planning a high(er) current run the final studies day April 24, 2006.
- We asked the beamline staff if they would be interested on opening their shutters to look at optics performance and quite a few said "yes".
 - 2BM,2ID,5ID,6ID,7ID,12ID,13ID,15ID,22ID,23ID,24ID,30ID have all requested to take part.
 - Beamline participation is contingent on a formal safety review for higher current operations.
- Limits: ASD is limiting study to a maximum of 130 mA to limit risk to RF systems.

Next Steps Toward High Current Run

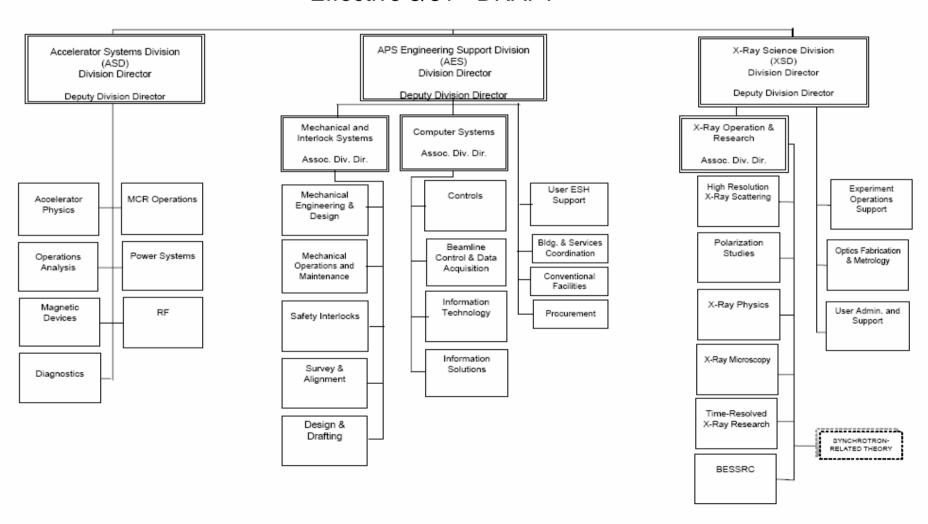

- APS Committee composed of ADDs/DDDs has been charged with revising Radiation Safety System Policies.
- ADD/DDD Committee will recommend to APS Management a formal process for reviewing these beamlines consistent with APS Policies. At a minimum, review will consist of
 - Review of thermal and stress analysis of high heat load radiation safety system components based on current design safety limits.
 - Review of radiation survey maps.
- After beamlines (either all or a subset of the participants) have been identified, then APS will work with beamlines to determine an experimental plan.

Any questions, contact John Quintana (jpq@aps.anl.gov)

Plan for APS Reorganization

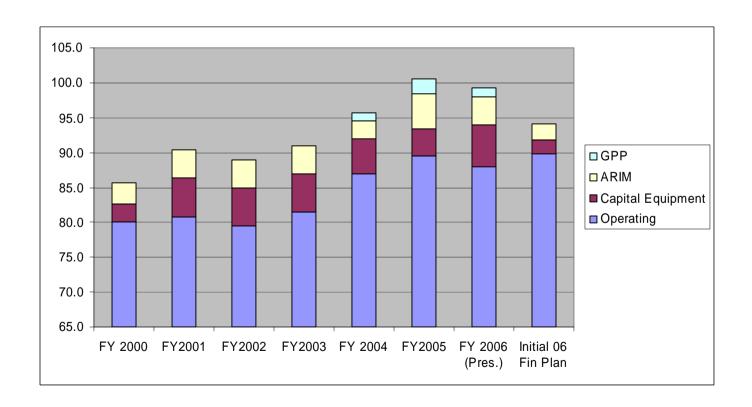

Effective 3/31 - DRAFT

APS BES Budget

\$89.8M Operating, \$2.2M ARIM and \$2.0M equipment so far. In addition almost \$5M effort from LCLS and CNM this year, but effort budget is now about 85% of total.....

Next Steps...

- Voluntary RIF package out to all APS divisions except XOR
 - Further action depends on FY2007 budget (unveiled in February 2006)
- We have posted a schedule with a week that has User Beamtime "to be determined" in the 2006-2 run cycle

Effect on Schedule

Possible reduction in user running time.

APS FY 2006 Long Range Operations Schedule (October 2005 - September 2006)

Run 2005-03 Run 2006-01 Run 204 0 ct Nov Dec Jan Feb Mar Арг May July Sept 1 1 → **A**//A// 2 1 → 2 */A//44/* 3 4/44/ 1 → 3 /A//// \rightarrow 4 /AV//// 1 → 1 → 1 → 6 /4//-1 6 /*A*//*/*// 1 → 7 /A///45// 1 → 1 → 8 1 → 1 → 9 1 → 1 → 0 /4//// 1 → 1 → 1 → **1** → 12 1 → 1 1 → 18//46/1 14 1 → 14 1 → 3//4/ 1 → 1 15///3/ 1 → 5/4 17 **1** → 05//44/ 15/14/ 3/44/ 15/14/ 5/44/19 15/44 18/14/ 18/14/ 21 *(%///* <u>12</u> /8//44/ 5/44 5/4 13//4 5 050 1 → Nov Feb Mar June July Aug Sept Top-up User Operation in low emittance mode SOM Periods Weekends e Studies 1 Hybrid Fill - (singlet) Non top-up User Operation Maintenance Lab Holidays 324 Singlets - Low E. Fill Fill pattern is 24 singlets unless Shifts set aside for Studies/ 1296 Singlets - Low E Fill otherwise shown. Machine Intervention as Needed 12/9/2005 * Either Machine Studies or User Operations

Next Steps...

- Voluntary RIF package out to all APS divisions except XOR
 - Further action depends on FY2007 budget (unveiled in February 2006)
- We have posted a schedule with a week that has User Beamtime "to be determined" in the 2006-2 run cycle
- Initially allocating ~\$1M equipment, and ~\$1M ARIM (project list under review by DDs)
- Any necessary involuntary RIFs will occur after president's budget announcement in Feb '06
 - Hoping for significant '07 budget increase to prevent serious setbacks
