

ASD POWER SYSTEMS GROUP

MISSION STATEMENT

The mission of the ASD Power Systems Group is to facilitate world-class science and technology research at the Advanced Photon Source, and to perform or support activities that benefit the science of accelerators and future light sources. This is accomplished primarily through

- Perform maintenance and provide support appropriate to meeting operational needs of the APS.
- Develop and implement solutions to key reliability and performance limitations.
- Develop and implement new and upgraded power supply equipment to meet programmatic needs of the APS.
- Establish standard work practices to promote consistent and high quality work at all levels.
- Foster a safe and productive work environment where APS and ANL safety policies are proactively followed, and where professional growth and technical competence are promoted.
