## Procedure for Visits to the Advanced Photon Source by Members of the Media

### 1 INTRODUCTION

#### 1.1 Purpose

This procedure is to assure that visits to the Advanced Photon Source (APS) by members of the media (photographer, videographer, reporter, writer, etc., denoted herein as the media requestor) or Communications and Public Affairs (CPA) media personnel or CPA or other VIP tours requesting photo access: 1) conform to U.S. Department of Energy and Argonne National Laboratory safety and security requirements; 2) are conveyed to the Photon Sciences Directorate (PSC) management; and 3) are conveyed to Argonne Communications and Public Affairs (CPA) who will assist with the visit in accordance with Argonne and CPA requirements for such visits.

#### 1.2 Scope

This procedure defines the steps to take prior to bringing a media requestor into an APS facility.

Media is defined as: The main means of mass communication (broadcasting, publishing, and the Internet), regarded collectively.

<https://en.oxforddictionaries.com/definition/media>

The procedure ensures that PSC management and the Laboratory media relations personnel are notified of the media requestor visit and details follow-on actions that require adherence to DOE and Argonne policies.

Requests for interviews with PSC personnel that do not include a site visit are not covered by this Procedure; see: Laboratory-Wide Argonne Policy [LMS-POL-7](#), Rev. 5, “Communications with the Public, News Media, and Government Agencies.”

#### 1.3 Applicability

This procedure is to be followed whenever a member of the media (photographer, videographer, reporter, writer, etc.) visits any APS facility.

## 2 PROCEDURE

The following procedure is to be initiated and completed by the person – Argonne employee or APS user – hosting/coordinating the visit by the media, or by CPA media personnel, or by VIP tours requesting photo access.

When the host/coordinator is a PSC employee, that person is responsible for informing their Divisional management of the visit.

If a user-hosted visit takes place at a collaborative access team (CAT)-operated beamline or sector, it is the responsibility of the CAT director/manager to make the user aware of the process described in this document and to ensure that the process outlined below is followed.

If the visit involves touring a sector operated by a CAT, then the CAT management will be notified in advance.
