

***Friends coming from far (and near),
Isn't it delightful?***

- Friends from whom I learned***
- Friends with whom I argued***
- Friends whom I may have helped***

細推物理須行樂，何用浮榮絆此身

*The principles for things, known by investigations,
are to follow the path of pleasure...*

Why then bind this body to the vanity of formality?

→ time to step back

My friends, I'll say it clear

Beam physics was pleasure,

Looking for π 's, marveling coherence, playing with Klimontovich..

And then also,

Flipping the second chicane, twisting the undulator ..

Yes, it was fun and much more

Then there were times, I'm sure you knew

When I bit off more than I could chew....

But through it all, when there was doubt

I made *Gaussian approximation*, and checked it reasonable

And I was able to stood tall !

I've loved, I've laughed and cried

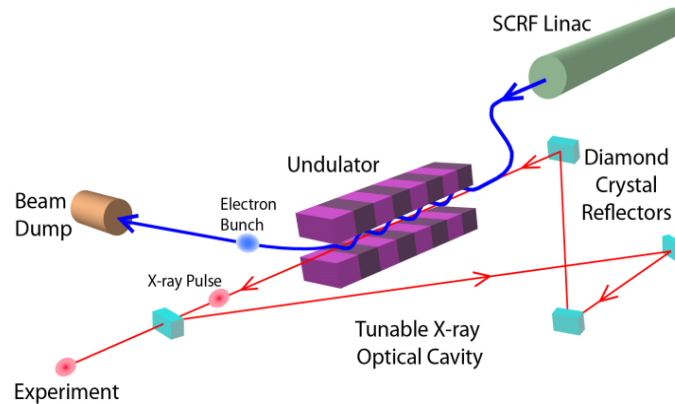

I've had my fill, my share of winning and losing

And now,...

**Old physicists never die,
they just dream..**

*I have a dream.
I have a dream that one day,
the **MBA-ring**,
the **X-ray FEL amplifier**,
And the **X-ray FEL oscillator**,
will be able to join, hands in hands complementing &
complimenting each other!*

IT'S TIME TO TRY CORRECT MANY NEGLECTED PRIORITIES!
