Argonne National Laboratory is a  
U.S. Department of Energy laboratory  
managed by UChicago Argonne, LLC.

# LINAC\PAR INTERNAL READINESS REVIEW

- After a prolonged shutdown and major upgrades to the Access Control and Interlock System (ACIS), an Internal Readiness Review was needed before restarting the Linac and the Particle Accumulator Ring (PAR).
- That internal review was held on Sept 7<sup>th</sup> and 8<sup>th</sup>, and the results showed we were ready to begin the restart.

# LINAC\PAR INTERNAL READINESS REVIEW

- The review focused on **people**, **processes and equipment** readiness.
- Included tours of the Linac, Particle Accumulator Ring and Booster tunnels and demonstrations of a search and secure procedure and the Access Control and Interlock System operations.
- There are more Readiness Reviews to come leading up to an Accelerator Readiness Review as we bring the facility back on-line.
