

APS WK#7: Wide-angle X-ray Photon Correlation Spectroscopy and Application of Speckle Spatio-temporal Correlation in Materials

Organizers: Yue Cao (MSD) and Eric Dufresne (APS)

The APS Upgrade beamline 8-ID will bring great, new capabilities for users of wide-angle x-ray photon correlation spectroscopy (XPCS) as well as more than double current available beam time. This workshop aims to attract new users and provide a forum for discussion on the future capabilities of the beamline and guide long term investments.
